Challenges of Excel tasks #2

Reliance on specific individual's experiences and knowledge

Improving day-to-day Excel tasks across departments can lead to **significant benefits** for the organisation.

Case Studies

Copyright © SCSK Europe Ltd.

Excel tasks can be categorized into the following three types:

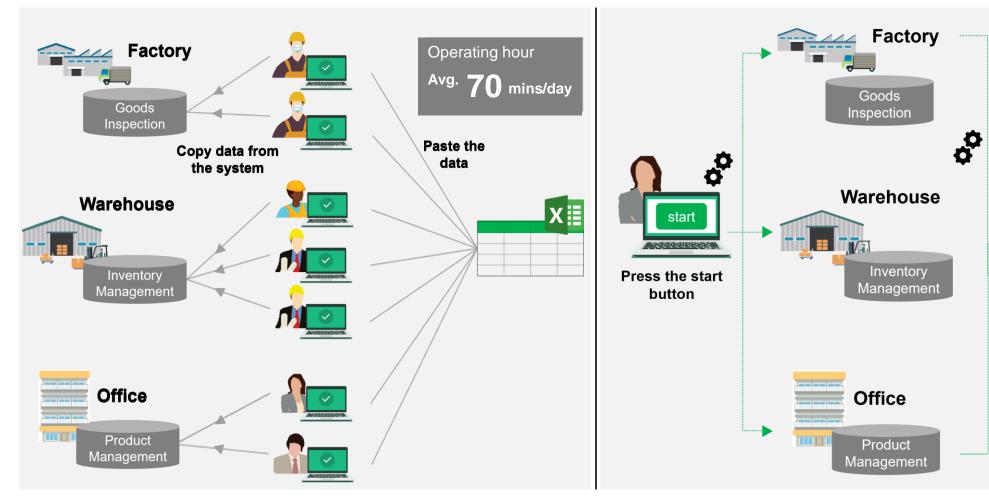

- **1. Routine tasks**
- 2. Aggregation tasks
- 3. Data management

Case 1. Automate manual process

Before

Every day, seven employees enter transcript data from various systems into an Excel file.

After

Press the start button and wait 2-3 minutes until the data transcription is completed

database

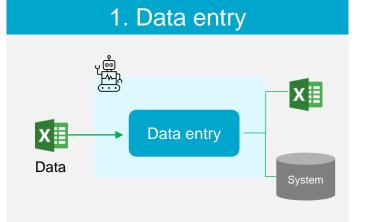

X

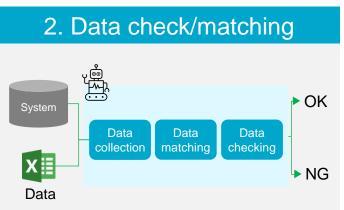

Operating hour

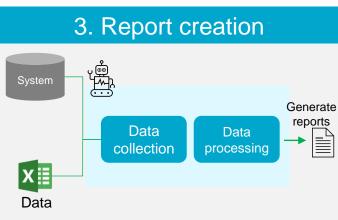

Avg. 2-3 mins/day

| Reducing working hours | Improvement of working environment |
|----------------------------------|---|
| Creating Excel list | Utilize the surplus time |
| 23 hours /month 1 hour /month | Acquire new skills |
| Reduced 22 hours /month | Employees can engage in new tasks and technology adaption |

Robotic Process Automation (RPA) enables the automation of inefficient manual Excel tasks.

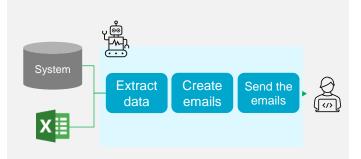

4. Information search

5. Create and send email

6. Data integration

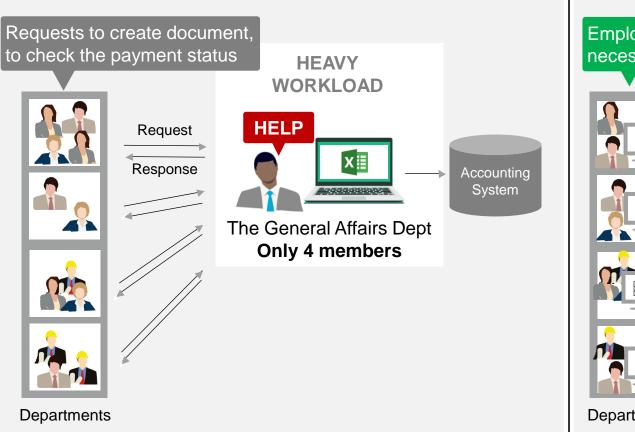

Case 2. Enhancing aggregation task process

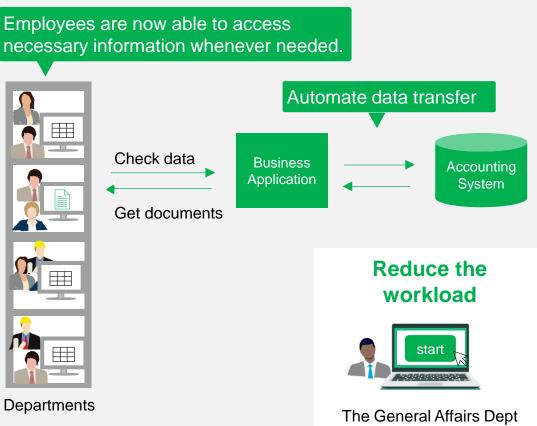

Before

The General Affairs Dept manages a variety of data across all departments using Excel.

After

The workload of the member in the General Affairs Department is reduced through systemization.

The three components that constitute a business application are:

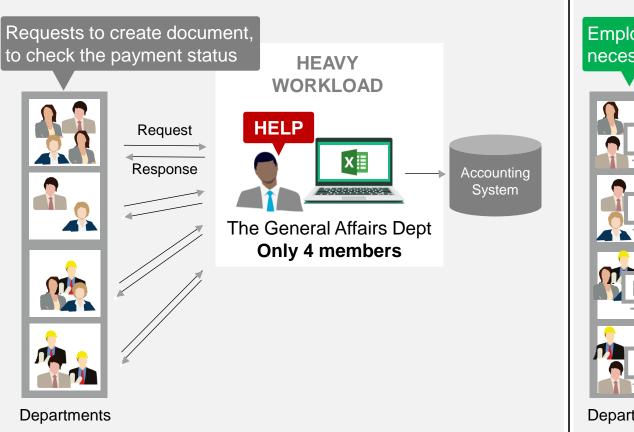

Case 2. Enhancing aggregation task process

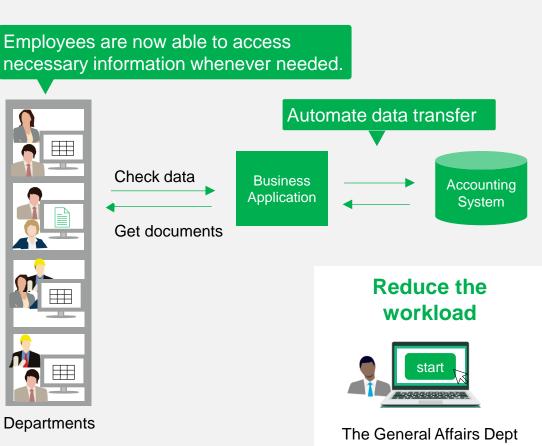

Before

The General Affairs Dept manages a variety of data across all departments using Excel.

After

The workload of the member in the General Affairs Department is reduced through systemization.

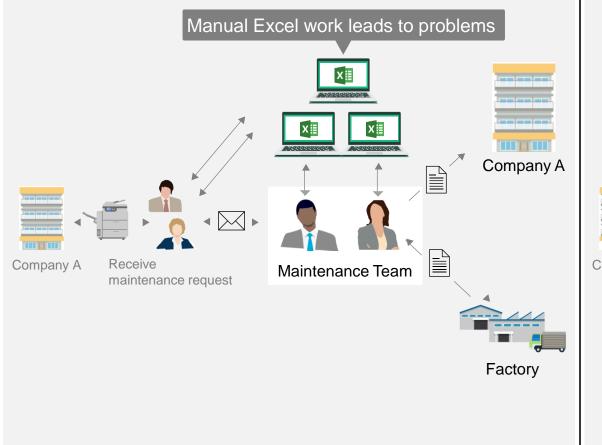

| Step 2 Identify the Processes to Streamline / 課題の洗い出し Step 3 Understand Workload / 業務量の把握 Step 4 Set Priorities / 優先度の設定 Step 5 Explore Improvement Solutions / 改善策の検討 | Step 1 | Document Current Processes / 業務一覧の作成 |
|--|--------|--|
| Step 4 Set Priorities / 優先度の設定 Step 5 Explore Improvement Solutions / 改善策の検討 | Step 2 | Identify the Processes to Streamline / 課題の洗い出し |
| Step 5 Explore Improvement Solutions / 改善策の検討 | Step 3 | Understand Workload / 業務量の把握 |
| | Step 4 | Set Priorities / 優先度の設定 |
| | Step 5 | Explore Improvement Solutions / 改善策の検討 |
| Step 6 Develop an Implementation Plan / 美行計画の作成 | Step 6 | Develop an Implementation Plan / 実行計画の作成 |

Case 3. Enhancing data management process

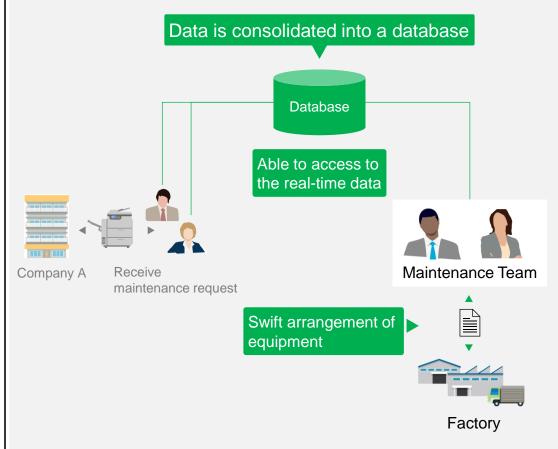

Before

The company utilized Excel for equipped maintenance management, but numerous inefficiencies were present.

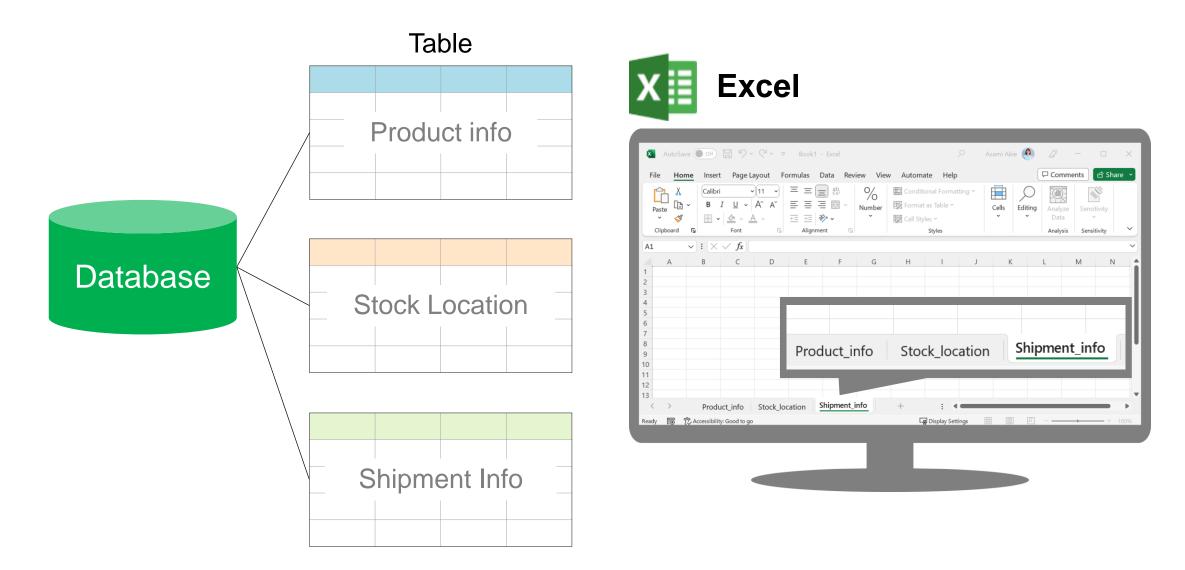

After

Through systemization, resulting in significant reduction in task time across various operations.

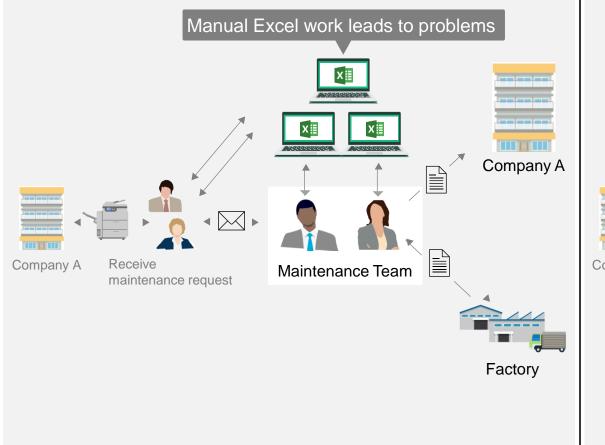

Data management using a Database

Case 3. Enhancing data management process

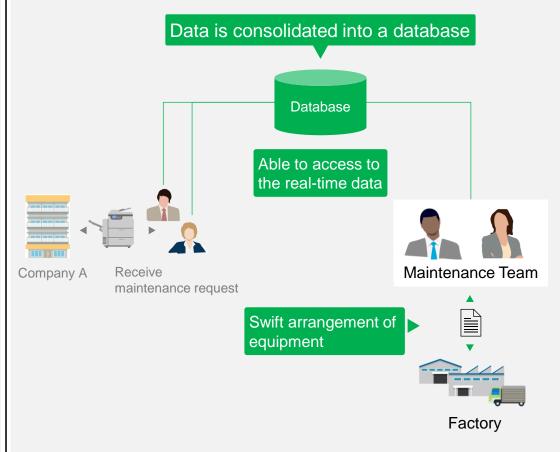

Before

The company utilized Excel for equipped maintenance management, but numerous inefficiencies were present.

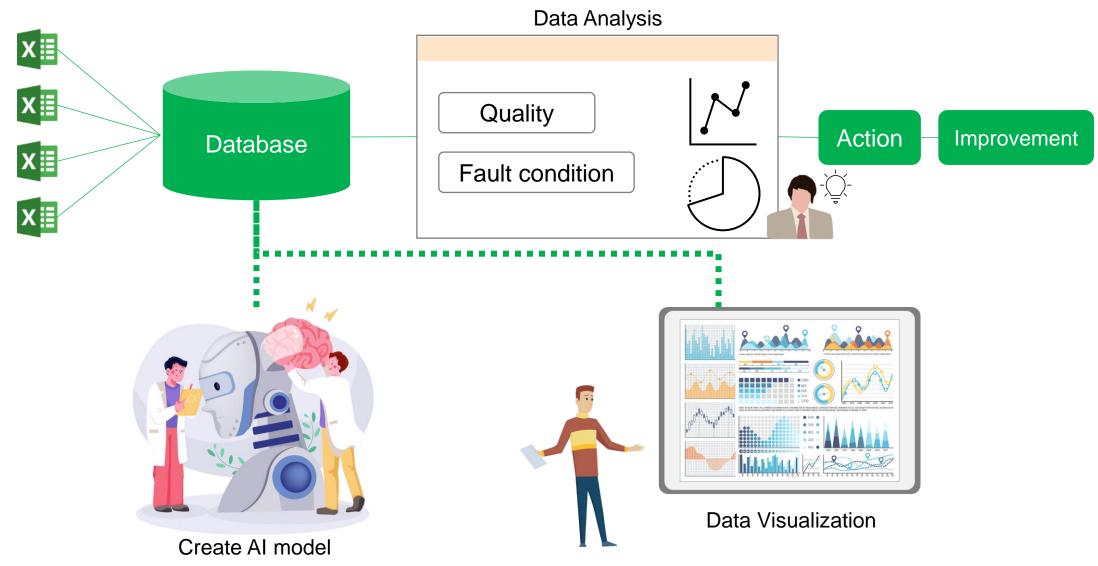

After

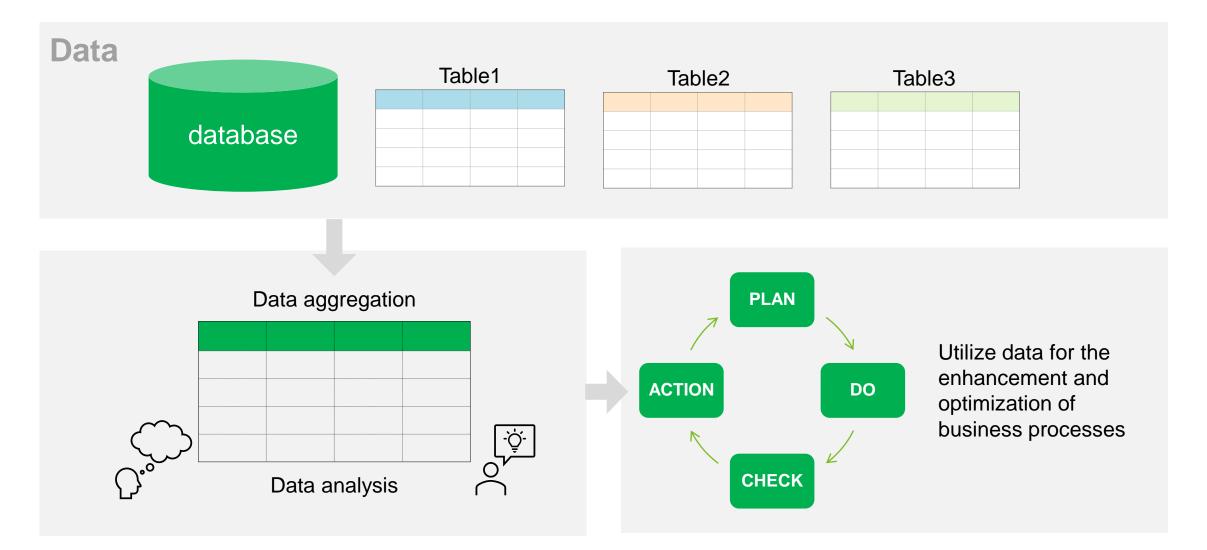

Through systemization, resulting in significant reduction in task time across various operations.

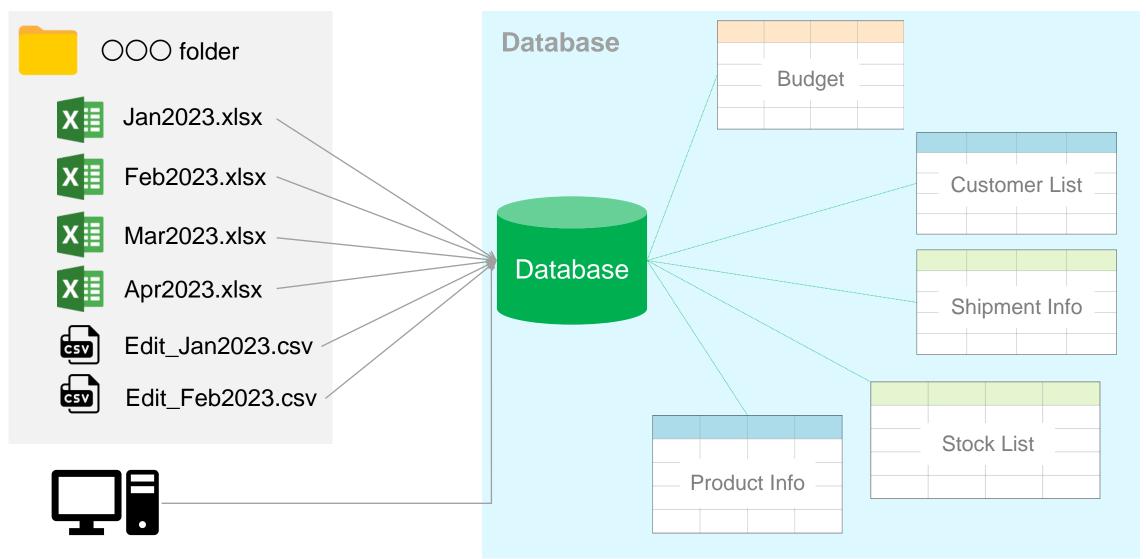

Case 3. Identification of Data Validations

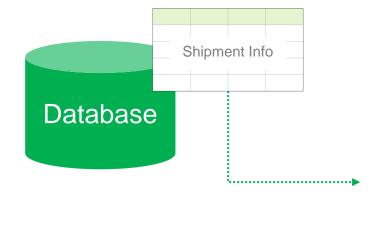

Data Utilization: Data Integration and Analysis

Centralize Data into a Database

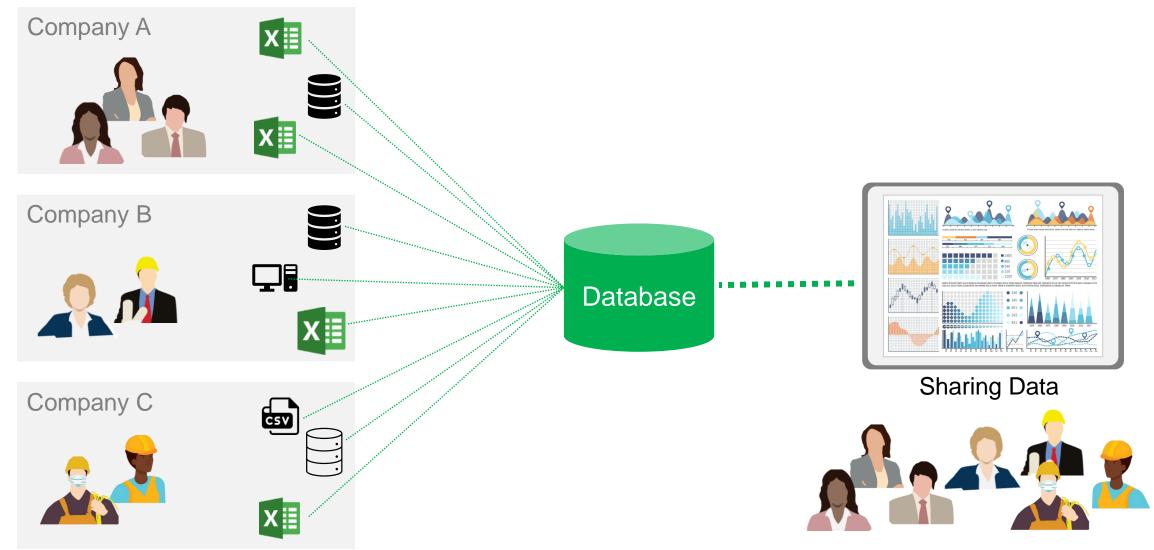

Centralize Data into a Database

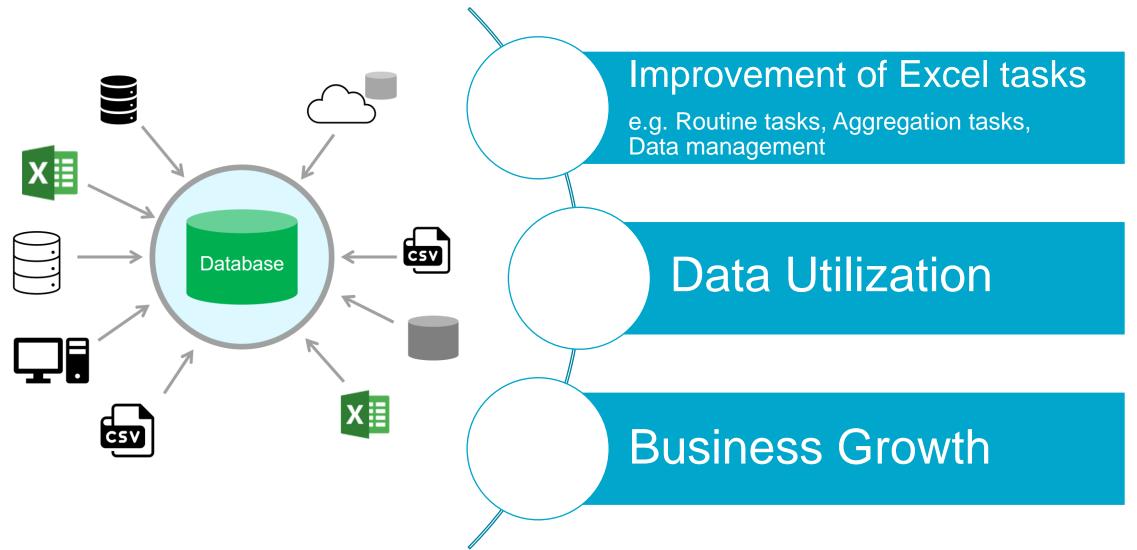

- Create business reports
- Data visualization
- Automate data aggregation

Conclusion

Thank you
